Tech Exhibit 2026 Student Briefer

Guide and Reminders for Participating Groups

This briefer serves as your guide and reference for the proper preparation and participation of all student groups in **Tech Exhibit 2026**. Please read and follow the reminders below to ensure a smooth and organized presentation of your project prototype.

A. What to Bring

- **Extension wire** – Each group is required to bring their own extension wire, as this is necessary for booth setup and project demonstration.
- **Extra devices (optional)** – Groups may also bring extra monitors, laptops, tablets, or other devices that can help present and showcase their prototype more effectively.
- **Own food/snacks** – Participants are encouraged to bring their own food or snacks, since no meals or snacks will be provided during the event.
- **Additional booth materials** – Groups may bring banners, tarpaulins, brochures, decorations, designs, and other materials that can improve the overall booth presentation.

B. Booth and Setup

Two groups will share one table or booth space for their presentation. Each group is responsible for setting up their own materials, devices, and booth arrangement. **You are free to design and organize your booth as you prefer, using tarpaulins, brochures, posters, and other presentation materials to effectively showcase your project.**

Please be reminded that a **prototype is required**. It must be fully prepared, functional, and ready for display and demonstration during the event.

All members are required to attend the ingress on April 29, 2026, starting at 5:00 PM, to select their space and set up accordingly. Kindly arrive on time to avoid delays and inconvenience.

C. Preliminary Pitching Rounds

In the morning, each group will **pitch and present their project prototype** to several mentors who will be roaming around the venue. Each group will be given **3 minutes for the pitching proper, followed by a 3-minute question and answer session**. The mentors may ask questions, clarifications, or inquiries regarding your project, so all members should be prepared to explain and defend their work clearly. **Startups are already categorized into three groups, and each team will compete within the category they belong to.**

Please note that your presentation will be **evaluated and scored based on the official judging criteria**.

D. During the Presentation

Groups are expected to stay at their assigned booth, accommodate mentors and visitors professionally, and ensure that their prototype is properly functioning during the event. All members should observe proper decorum, teamwork, and readiness throughout the activity.

E. Lunch Break

Students may take their lunch break from **12:00 NN to 1:00 PM** only. **Please be advised that no snacks or meals will be provided**, so all participants are encouraged to bring their own food and prepare accordingly. The attendance schedule shall be observed as follows: **Morning In – 7:00 AM, Morning Out – 12:00 NN, Afternoon In – 1:00 PM, and Afternoon Out – 5:00 PM**. All groups are expected to return immediately to their assigned area after lunch and prepare for the afternoon program and remaining event activities.

F. Final Pitching Round

In the afternoon, the top three teams from each category will be selected based on the preliminary pitching and will advance to the final pitching round. During this stage, each team will present their refined project to the panel of judges. **Each group will be given 5 minutes for the final pitch, followed by a 5-minute question and answer session.** The presentations will be evaluated based on the official judging criteria, and teams are expected to clearly communicate their ideas, demonstrate improvements from the preliminary round, and respond confidently to the judges' questions.

G. Important Reminders

Make sure all devices are fully charged and all necessary files, links, and presentation materials are ready before the event starts. Test your system or prototype early to avoid technical problems during the evaluation. Keep your booth clean and organized at all times. Please take care of your own trash and make sure to dispose of it properly in the designated garbage bag. Most importantly, be ready, confident, and professional in presenting your project.

H. MENTORS AND JUDGES

	Name	Company/Position
1	Constantino A. Brasileno, Jr.	Director, iDEYA Center of Innovation and Technopreneurship
2	Roy Shemuel Yabut	Secretary General, Roy plaza Corp.
3	Dr. Cecilia S. Bucayong	Founder and CEO, Experience Science
4	Reymark Anggoy	Founder & CEO, Haturiko
5	Rio Al-Di Dompol	Founder, Full Stack Developer, Azxtech Solution
6	Ric JR Suazo	Founder & CEO, iTago App
7	Van Zambrano	Lead Operation | Founder, GORA
8	Keren Happuch Lacaden	Co-Founder, POLLD
9	Neil Tubio II	Tech Business Educator
10	Darryl Becera	Owner, The Beceras Founder, Xyrva Digital
11	Arnold F. Dela Cruz	CEO, Trakz Software Development Service
12	Edmond Siega	Founder and CEO, Farmura
13	Aivan John Caniadilla	Founder, Padayon Digitals

PROGRAM FLOW

7:00 AM – 8:00 AM	Arrival & Registration
8:00 AM – 8:20AM	Invocation National Anthem
8:20 AM – 8:30AM	Opening Remarks: **Jose S. Valmorida, Ph.D.** Vice President of Academic Affairs
8:30 AM – 8:40AM	Introduction of Invited Guests **Ms. Glyrhiz Marhiel A. Tabamo** CISC Faculty Member
8:40 AM – 8:50AM	Criteria for Judging: **Lorie Cagalitan** CISC Faculty Member
8:50 AM – 12:00 PM	**Parallel Mentoring/ and first Judging Session: (Preliminary Round)** • Category 1: Enterprise & Commercial Solutions • Category 2: Industry / Sector-Focused Solutions • Category 3:Consumer & Lifestyle Solutions
12:00 PM – 12:15 PM	Awarding of Tokens & Certificates to mentors
12:15 PM – 1:00 PM	**LUNCH BREAK**
1:00 PM – 1:10 PM	Introduction of Judges: **Ms. Rizza Mae Dagoc** CISC Faculty Member
1:10 PM – 1:20 PM	Final Pitching Mechanics: **Ms. Junelle Francis Ocoy** DEVCON Bukidnon Representative
1:45 PM – 2:00 PM	Final Pitching
2:00 PM – 4:00 PM	Tech in Medical Field **Paul Harriet Asiñero** Contributor, Free and Open-Source Software
4:00 PM – 4:20 PM	Awarding of Tokens & Certificates to judges
4:20 PM – 4:40 PM	Announcing of Winners
4:40 PM – 5:00 PM	Closing Remarks: **Mr. John D. Tajones** Dean, CISC

A. Enterprise & Commercial Solutions

Solutions primarily serving businesses, commerce, and operations.

	Startup	Problem / Need	Solution	Target Users
1	E-Serbisyo	Lack of accessible, trusted, organized platform connecting service providers and seekers	Centralized platform connecting skilled workers with households and small businesses	Service providers & service seekers
2	SERVICE HUB	Inefficient matchmaking between service providers and seekers, lost income opportunities	Online marketplace for buying/selling skills and services	Service providers & service seekers
3	OnTime	Diners face uncertainty in restaurant availability, wait times, and reservations	Location-based real-time restaurant info with booking and queue management	Restaurant owners & diners
4	SeatSide Digital Menu	Manual order-taking causes delays, errors, and operational waste	Interactive table-side system for ordering and payment	Restaurant owners & managers
5	ART FLOW	Local artists have low visibility and limited access to buyers	Centralized online marketplace for artists to showcase and sell work	Local artists & clients/buyers
6	BH Finder	Difficulty finding affordable, safe, and available boarding houses	Centralized platform to search by price, location, amenities	Landlords & renters
7	RENT & ROUTE	Car rental inefficiencies, safety & transparency issues	SaaS-based car rental management system with real-time tracking	Car rental owners & renters
8	DREAMAKER	Fresh IT graduates & students struggle to find side jobs or internships	Online job platform for IT graduates and college students	Fresh IT graduates, IT students, business owners
9	HeamStitch	Garment designers spend hours creating patterns and managing delivery	Interactive 2D pattern generation & stitched simulation system	Fashion designers, tailors, apparel companies

B. Industry / Sector-Focused Solutions

Solutions targeting specific industries or professional sectors.

	Startup	Problem / Need	Solution	Target Users
i. Agriculture & Farming				
1	Farmlink	Vegetable oversupply/undersupply between farmers and buyers	Connects vegetable farmers with supermarkets/restaurants for bulk transactions	Supermarkets, restaurants, farmers
2	DailyGreens	Residents struggle accessing fresh produce; farmers face inconsistent demand	Platform connecting residents with local farmers for convenient ordering	Residents & farmers
3	AgriBuddy	Informal, inefficient agricultural equipment rental process	Platform for equipment listing, booking, transparent pricing, optional delivery	Small-scale farmers & equipment owners
4	EcoTrace	Landowners lack tech to prove carbon absorption, global buyers can't verify carbon credits	Platform & device to track carbon credits, generate income for rural communities	Farmers of Bukidnon & global corporation
ii. Transportation & Logistics				
5	PASAHERO	Informal transport difficult to find; fares inconsistent; no location tracking	App connecting drivers and passengers with fare transparency & safety	Local drivers & commuters
6	ScanFare	Public transport relies on manual fare collection causing delays and errors	NFC-based fare collection for buses/jeepneys	Passengers & transport operators
7	ParkPal	Drivers waste time searching for parking, causing stress & congestion	AI camera-based system showing real-time parking availability	Mall operators & drivers
8	Summit Slots	Finding parking areas in Malaybalay City	Platform to book parking spaces offered by lot owners	Private vehicle drivers & lot owners

iii. Education & Learning				
9	BrainLink	No centralized platform for academic support	Connects students, parents, and tutors for reliable academic support	Students, parents, tutors
10	CheckMark: Online Behaviour Verification	Students/job seekers have no verifiable proof of positive online behavior	AI-powered web certification with tiered badges	Students, recent graduates, institutions
11	InterviewVR	Job seekers lack realistic interview practice, leading to anxiety & poor performance	VR-based interactive interview simulator	Job seekers, fresh graduates, career shifters
12	Rivo	Students with disabilities struggle taking complete notes	AI audio-to-text transcription with summaries	Students with learning challenges & busy professionals
iv. Tourism & Travel				
13	Venture	Hikers face costly and inconvenient trip preparation	Web app for renting hiking gear affordably and conveniently	Hikers planning trips in Bukidnon
14	BukidKnown	Tourists struggle finding reliable travel info	Centralized digital platform with accurate tourist info	Local & international tourists, students, travel enthusiasts
v. Healthcare & Medical				
	Startup	**Problem / Need**	**Solution**	**Target Users**
15	Wellora LabKit System	Manual lab result release causes delays, extra costs	Digital lab access system with coded kits & online results	Patients of clinics & community health centers
16	MediQ Hospital & Clinic Queuing System	Long, confusing queues in clinics/hospitals	Digital booking & queuing system	Clinics, hospitals, staff & patients
17	DocMap Bukidnon	Difficulty locating and coordinating medical specialists	Digital mapping system for specialists, showing schedules, services, and appointments	Patients around Bukidnon
18	VetDoze	Manual vet drug dosage errors; students lack practical experience; pet owners need guidance	Digital system for accurate drug dosage, suggested treatment plans, student learning, clear pet care guidance	Veterinarians, veterinary students, pet owners

C. Consumer & Lifestyle Solutions

Solutions focused on individuals, households, or community needs, improving daily life, convenience, safety, and personal well-being.

	Startup	Problem / Need	Solution	Target Users
1	Danger Alert	Residents lack fast emergency reporting	IoT two-button device for instant alerts	Residents in high-risk areas, students, families, emergency agencies
2	SentinelClick Technology	Emergency reporting relies on manual phone use, slow in high-stress situations	IoT wearable/keychain button for one-click emergency alerts	Parents, vulnerable residents, night-shift workers
3	KaWatch	Commuters & vendors unaware of crime hotspots	Mobile app with risk alerts & maps	Daily commuters, street vendors, tourists
4	BillExplain	Customers don't understand utility bills	AI-powered app explaining bills, detecting anomalies	Electricity consumers & utility providers
5	CLARIO	Communication anxiety, low speaking confidence	AI-powered simulator for private, judgment-free practice	Students & early-career professionals
6	PickleHub Courts	Difficulty booking pickleball courts & finding partners	Platform for reservations, waitlists, training sessions	Pickleball players, students, young adults
7	Handl: Aging in Place Support	Adult children cannot monitor elderly parents	Connects trained local helpers & family dashboard	Aging parents & adult children
8	Pasugo	Students lose time running errands on campus	Campus-based errand & delivery app	CMU students
9	Valencia Rice Lock	Unpredictable rice prices	Lock-in rice app to buy at current price for later redemption	Low to middle-income households
10	OnlyBreed	Breeders struggle to find suitable mates for pets	Swipe-based mobile matching platform	Pet owners & small breeders
11	Hulam	Difficulty accessing temporary-use items	Structured & trusted borrowing/sharing system	Students, student organizations, community members
12	FurniView AR	Customers struggle purchasing furniture due to limited options, sizing, visualization	Mobile app with AR, customization, ordering, and rating system	Homeowners, renters, online shoppers
13	SpendWise	College students lose track of allowance	App for tracking personal/group expenses	Filipino college students
